Art Unit: 1656

This Office action is in response to Applicants' amendment after final received December 29, 2006.

The indicated allowability of claims 26-27, 29-32 are withdrawn in view of new rejections and objections

Therefore, the finality of the previous Office action is withdrawn.

Applicants' arguments have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous Office actions are hereby withdrawn.

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1656.

Claims 26-27, 29-32 are pending.

Specification

The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. For example, at page 17 line 34; at page 18 line 16; at page 19 line 17, 33. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1656

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26-27, 29, 30-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 26-27 have been amended to recite wherein the protein variant is a variant of a scaffold protein *Mal d 1* having a three-dimensional folding pattern that is structurally similar to that of the naturally occurring allergen, said protein variant comprises two or more primary mutations and so forth. These properties are believed to be already present in instant SEQ ID NOS: 2 and 3; therefore, it is believed that reciting these properties would be redundant.

In claim 29, the term homologous is interpreted to be equivalent to the term identical and therefore, the term homologous can be deleted.

Claims 30-32 are drawn to the mutations of a protein variant. The claims recite primary and secondary mutations but do not recite a SEQ ID reference. It is unclear what the mutations are drawn to because as disclosed, the mutations are drawn to any residue on any amino acid sequence. The claims should be corrected to include the relevant amino acid sequence to which the protein variant is drawn to because the polypeptide sequence is essential to the function of the invention.

Claims 30-32 were previously rejected under 35 U.S.C. 112, second paragraph, as being indefinite for not reciting a SEQ ID NO, (the Nov. 24, 2004 Office action and the May 19, 2005 Office action). However, the rejection of claims 30-32 was mistakenly withdrawn in the January

Art Unit: 1656

6, 2006 Office action. Applicants need to provide a SEQ ID NO. because the instant claims recite specific amino acid residues from which the mutations are selected from. Therefore, providing the Accession Nos. is not deemed to be sufficient.

No claim is allowed.
